**ATAPS**

shApe

**PIR**

# PIR

## Partners **In** Recovery

- PIR Minimum Data Set (MDS) information captured within individual demographics or needs assessments to support the PIR Reporting Framework
- All mandated PIR forms and outcome assessment built as tools within Penelope
- Modules developed with flexibility to support variances in the business process flow across PIR agencies
- Reports being developed to meet the Department specifications for quarterly PIR reporting.

# ATAPS

## Access to Allied Psychological Services

- Internally employed ATAPS Allied Health Providers (AHPs) now able to manage appointments and complete session outcomes using Penelope's event management and document capabilities
- Assessment tools such as K10 and DASS built into Penelope and outcomes tracked across the duration of the service
- All letters to clients, referrers and allied health providers available online along with auto population of key client information
- Mandatory reporting to Department of Health and other government agencies now available through inbuilt and customised Penelope reports

# CLOSE THE **GAP**

- Home Visit and Assessment forms now automated and available online
- Outreach workers for Close the Gap able to complete notes and assessment outcomes using laptops and iPads giving them greater mobility and access to patients
- Out of box reports provide insight into client appointments and worker availability and utilisation
- Monthly Department of Health reporting automated through Penelope

## **GP After Hours Program**

- Portal developed for use by General Practices to review and update their operating hours and services and approve quarterly incentive payments
- Practices can upload supporting documentation as required
- Incentive payments auto calculated based on Tier levels and SWPE
- Automatic email notifications and reminders sent to Practices each quarter
- Detailed reporting available on Practices and Incentive payments

# shApe

## Sessions for Health & Physical Exercise

- SHAPE program is now fully online removing the reliance to maintain physical folders and paper files
- Assessment tools for SHAPE with complex calculations such as BMI, IPAQ and VO<sub>2</sub> Peak now automated within Penelope
- Initial and Final assessments fully automated with data pulled through from multiple sources and tools
