

BEAS
MANUFACTURING

SAP® Certified
SAP Business One Integration

**TRANSFORMING YOUR
PACKAGING BUSINESS**

BECOME MORE EFFECTIVE WITH BEAS MANUFACTURING

The packaging industry plays a key role in branding and product differentiation. With frequent changes in its technology landscape, rising cost of raw materials, evolving and exploding e-commerce, and the requirement for environmental and sustainable packaging are just some of the challenges faced by leading packaging companies.

The current market place and its competitive nature requires manufacturers to keep up to date with market trends and inventions to stay ahead of the competition.

Beas Manufacturing for the Packaging Industry solution provides real time visibility into every step of the production process. It was designed with these needs in mind, while having a modular approach and offers flexible deployment as modules can be purchased and "turned on" during appropriate phases of implementation.

Beas for Packaging Industry expands SAP Business One to include industry-specific functions like officially regulated business processes. It also supports packaging companies in creating more efficient and flexible production, logistics and supply chain management processes.

"FOR THE FUTURE, THE CHOSEN SOLUTION OFFERS US GREAT POTENTIAL FOR DEVELOPMENT IN THE DIGITALIZATION OF OUR PROCESSES, THE CONNECTION OF OUR LOCATIONS AND CLOSER NETWORKING WITH OUR CUSTOMERS."

**Peter Härtl, Quality Management,
WECK Industrieverpackungen**

Product highlights

- Convenient cost calculation per article, production order and batch; flexible multi-level margin calculation, etc.
- APS for group, individual and alternative resources (machinery, tools, personnel), in order to optimize capacity and productivity.
- Easy integration of subsystems like CAD/PLM, machinery (PLC), pattern optimization, etc.
- ISO compliance (functional) through quality assurance all along the supply chain and comprehensive documentation.
- Real-time reporting –always know what you have in stock.
- Full traceability of production products with just 2 clicks.
- Shorter production cycle times, improved production efficiency and quicker and better customer response time.
- Digitalized production control - paperless communication between the administration and the production units.
- QA process and reports that can be transferred digitally.

"WE ARE PROUD THE COMPANY IS WORKING TOGETHER WITH SAP BUSINESS ONE AND BEAS MANUFACTURING. IT REALLY IS A TAILOR MADE PROGRAM FOR US."

Antonio La Franceschina, CEO, ACM Srl.
