

SAP® Certified
SAP Business One Integration

**TRANSFORMING YOUR
PLASTICS BUSINESS**

BECOME MORE EFFECTIVE WITH BEAS MANUFACTURING

The plastics industry is an extremely competitive and fast-changing market. This can be difficult for manufacturers to keep up, especially if they lack the expertise or IT resources necessary to stay on top of all these changes.

In today's marketplace, plastic manufacturers need to produce various plastic goods for many different customers. Still, they also need the ability to offer more than just essential products and process data.

What is Beas Manufacturing Software?

Beas Manufacturing for the Plastics Industry solution provides real-time visibility into every step of the production process.

It was designed with these needs in mind while having a modular ap-

proach that offers flexible deployment as modules can be purchased and "turned on" during appropriate implementation phases.

Beas Manufacturing software expands on SAP Business One with

industry-specific functions that experts in each industry design.

The plastics manufacturing solution includes faster and more efficient product quoting and efficient resource optimization.

"MRP, RESOURCE MANAGEMENT, QUALITY AND PRODUCTION ORDER MANAGEMENT ARE MUCH CLEARER THAN THE NATIVE ONES IN SAP (BUSINESS ONE)."

Juan Anselmo Pérez Aguilar, CIO, Promociones Fantásticas

Product highlights

- Beas Manufacturing includes industry-specific functionality, including batch management capabilities and traceability of batches.
- Beas Manufacturing for Plastics Industry streamlines the quality assurance process by comprehensively documenting any changes to the data and all testing processes.
- Easy-to-use cost calculation and cost accounting. Including profit and loss calculations for each product line, multi-level margin calculation, etc.
- Beas Manufacturing includes the integration of complex BOMs, compliance checks, and document creation.
- Reporting in real-time is an essential capability for the plastics industry. This includes knowing what a company has in stock, what it has been sold, and the sales forecast for future production.
- We are providing seamless integration between your Manufacturing processes and SAP Business One.

"WITH BEAS MANUFACTURING AND SAP BUSINESS ONE, I NOW HAVE A WIDE RANGE OF POSSIBILITIES IN TERMS OF REPORTING, DASHBOARDS AS WELL AS PROCESS MANAGEMENT AND OPTIMIZATION."
